Re: Laylor Drive and Queens Highway Water Main Replacement Project Laylor
Drive and Queens Highway Resurfacing Project

Dear Resident:

This letter is to inform you of two (2) upcoming construction projects planned to occur along Laylor Drive and Queens Highway. You are receiving this letter because the City of Parma Heights anticipates that you will be impacted by both projects.

The Water Main Replacement Project will be under construction first. The resurfacing project will not take place until the Water Main Contractor has completed their work and the city has issued their acceptance of the work.

WATER MAIN REPLACEMENT PROJECT

What will the work entail?

Water Main Replacement: The work includes the removal and replacement of 1,400 feet of the existing 6¹¹ water main with an 8¹¹ water main along Laylor Drive and Queens Highway. This project also includes removing and replacing fire hydrants, line valves, and other appurtenant work.

Temporary Water Main & Service Connections: To complete the abovementioned work, the Contractor will be installing temporary water mains along the roadway gutter line (face of curb), tree lawns and/or sidewalks to maintain water for domestic and fire use within the project limits. Contractor will also be installing a hose

(temporary service connection) along the ground from the Temporary Water Main to the spigot at your house.

Why my street?

The Cleveland Water Department takes pride in providing reliable, high-quality water to customers throughout their distribution area. In order to continue to ensure reliability of their network, the Cleveland Water Department regularly replaces aging infrastructure that may be susceptible to breaking with newer, more dependable infrastructure. Multiple factors are considered when determining which water mains should be replaced, including age, size, material, location and break history.

Through analysis of these factors, the Cleveland Water Department has determined that the infrastructure designated for replacement in this project area has reached the end of its useful life. Replacing this aging infrastructure will reduce the likelihood of future water main breaks and service disruptions in the area.

What is the Project Timeline?

Work is scheduled to begin on June 2nd (Holy Name High School last day of school is June 1st)

How will this project affect me and/or my business?

Water Service Disruption: You may experience a temporary disruption to your water service at some point during the project. Disruptions may last up to 8 hours. Advance notifications will be provided by the contractor via notices attached to your door, so please keep an eye out for notices.

Traffic: During construction, access to homes will be allowed.

What is the cost?

There is no charge to the property owners or rental tenants for this work.

RESURFACING PROJECT

What will the work entail?

Plane (remove) asphalt down to concrete base. Minor curb and base repair. Install asphalt overlay.

What is the Project Timeline?

Upon completion of Water Main Project. We estimate work beginning late August to early September 2022 (weather dependent).

How will this project affect me and/or my business?

You may experience a temporary disruption to your driveway during planing and asphalt paving operations. Drive access may also be impacted if base repair occurs in front of your drive. Advance notifications will be provided by the contractor via notices attached to your door, so please keep an eye out for notices.

What is the cost?

There is no charge to the property owner or rental tenant.

PLEASE NOTIFY ME AS SOON AS POSSIBLE IF YOU HAVE SPECIAL NEEDS AND ACCESS TO YOUR DRIVE IS NEEDED AT ALL TIMES.

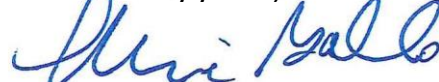

For questions related to this project feel free to contact me at dtbender@euthenicsinc.com or at (440) 260-1 555 with any questions concerning the project.

~~Very truly yours,~~

Daniel T. Bender, P.E.
Consulting City Engineer

~~Very truly yours,~~

Mayor Marie Gallo
