**Re: Notabene Drive Water Main Replacement Project**

Dear Resident:

This letter is to inform you of the construction project planned to occur along Notabene Drive. You are receiving this letter because the City of Parma Heights anticipates that you will be impacted by this project.

### **WATER MAIN REPLACEMENT PROJECT**

#### **What will the work entail?**

Water Main Replacement: The work includes the removal and replacement of 1,350 feet of the 8" water main along Notabene Drive. This project also includes removing and replacing fire hydrants, line valves, and other appurtenant work.

Temporary Water Main & Service Connections: To complete the abovementioned work, the Contractor will be installing temporary water mains along the roadway gutter line (face of curb), tree lawns and/or sidewalks to maintain water for domestic and fire use within the project limits. Contractor will also be installing a hose (temporary service connection) along the ground from the Temporary Water Main to the spigot at your house.

#### **Why my street?**

The Cleveland Water Department takes pride in providing reliable, high-quality water to customers throughout their distribution area. In order to continue to ensure reliability of their network, the Cleveland Water Department regularly replaces aging infrastructure that may be susceptible to breaking with newer, more dependable infrastructure.

Multiple factors are considered when determining which water mains should be replaced, including age, size, material, location and break history. Through analysis of these factors, the Cleveland Water Department has determined that the infrastructure designated for replacement in this project area has reached the end of its useful life. Replacing this aging infrastructure will reduce the likelihood of future water main breaks and service disruptions in the area.

#### **What is the Project Timeline?**

Work is scheduled to begin on June 8th.

**How will this project affect me and/or my business?**

Water Service Disruption: You may experience a temporary disruption to your water service at some point during the project. Disruptions may last up to 8 hours. Advance notifications will be provided by the contractor via notices attached to your door, so please keep an eye out for notices.

Traffic: During construction, access to homes will be allowed.

**What is the cost?**

There is no charge to the property owners or rental tenants for this work.

**PLEASE NOTIFY ME AS SOON AS POSSIBLE IF YOU HAVE SPECIAL NEEDS AND ACCESS TO YOUR DRIVE IS NEEDED AT ALL TIMES.**

For questions related to this project feel free to contact me at [dtbender@euthenics-inc.com](mailto:dtbender@euthenics-inc.com) or at (440) 260-1555 with any questions concerning the project.

Very truly yours,

Daniel T. Bender, P.E.  
Consulting City Engineer
